Ahmed El-Mahdy

Platform/DevOps Engineer | Azure, Terraform, Kubernetes, GitHub Actions, CI/CD

Cairo, Egypt

Summary

Cloud & DevOps Engineer with 5+ years of experience in cloud infrastructure, platform operations, CI/CD, and environment modernization across Azure and AWS. Hands-on with Terraform, Kubernetes, Helm, GitHub Actions, Docker, and cloud governance. At Julfar Consultancy Services, I work on stabilizing inherited environments, modernizing delivery pipelines, and enabling secure, scalable platform operations. My recent experience includes Azure-to-Terraform alignment, GitLab-to-GitHub Actions migration, microservice onboarding, Helm and Argo CD workflows, Azure API Management integration, Key Vault and secret governance, Azure/Entra RBAC, and cloud cost optimization. I'm passionate about DevOps, Platform Engineering, Infrastructure as Code, Kubernetes, and building reliable cloud environments through automation, clear documentation, and low-risk change management.

Experience

Julfar Consultancy Services

4 years 9 months

Platform/DevOps Engineer | Azure, Terraform, Kubernetes, GitHub Actions, CI/CD

January 2026 - Present (6 months)

Cairo, Egypt

Working as a Cloud & DevOps Engineer focused on Azure platform operations, Terraform-based infrastructure management, Kubernetes delivery, and CI/CD modernization. My work includes stabilizing inherited environments across DEV, STAGING, and PROD, resolving drift and configuration risks, onboarding new microservices through GitHub Actions, Helm, and Argo CD, and integrating secure delivery patterns with Azure Key Vault, Azure API Management, and Azure/Entra RBAC.

I also contribute to cloud cost optimization, technical documentation, architecture visibility, and stakeholder communication to support reliable, low-risk platform delivery across complex environments.

Technologies & Areas:

Azure, Terraform, Kubernetes, Helm, Argo CD, GitHub Actions, Azure API Management, Azure Key Vault, Docker, Linux, CI/CD, Cloud Governance, RBAC, Monitoring, Cost Optimization

System Administrator

October 2021 - January 2026 (4 years 4 months)

Cairo

As a System Administrator:

Infrastructure Management & DevOps:

Administer and maintain a diverse infrastructure of Windows and Linux servers, AWS CloudFormation stacks, and VDI environments, ensuring high availability and reliability.

Spearhead the implementation of DevOps best practices, with a focus on Infrastructure as Code (IaC) and the automation of CI/CD pipelines, streamlining development workflows and accelerating delivery cycles.

Automate system configuration, software deployments, and infrastructure provisioning, ensuring consistency and efficiency across all environments.

Network Security & System Optimization:

Troubleshoot complex network issues, proactively identifying and resolving bottlenecks to ensure optimal system performance and minimal downtime. Implement and maintain cloud security best practices, ensuring compliance with industry standards and regulatory requirements to protect sensitive data. Continuously monitor and optimize systems for performance, security, and compliance, applying best practices to reduce vulnerabilities and enhance system stability.

Technical Support & Continuous Improvement:

Provide expert remote support, managing and maintaining shared resources and internal systems, ensuring seamless operations for the organization. Collaborate cross-functionally on infrastructure-related tasks, offering insights and solutions that improve the overall IT environment.

Stay ahead of industry trends by continually learning about emerging cloud technologies, DevOps tools, and system optimizations, leveraging new knowledge to continuously enhance IT operations and business agility.

Mosadad
Cloud & DevOps Engineer
January 2026 - Present (6 months)
Cairo, Egypt

Digital Egypt Pioneers Initiative - DEPI
DevOps Engineer
April 2024 - January 2025 (10 months)
Cairo, Egypt

"Software Development - DevOps Engineer" program:

Comprehensive DevOps training covering essential tools and practices, including Git, Ansible, Docker, Jenkins, Kubernetes, and Prometheus. Focus on cloud technologies, featuring AWS Cloud architecture principles and Terraform for infrastructure as code. Practical experience through real-world application projects, emphasizing the full DevOps lifecycle from source code management to continuous monitoring.

This program, overseen by Egypt's Ministry of Communications and Information Technology, aims to equip participants with a well-rounded skill set in modern DevOps practices and cloud technologies.

Ministry of Communications and Information Technology (MCIT),
Egypt
DevOps Trainee
November 2023 - April 2024 (6 months)
Cairo, Egypt

- Completed a six-month intensive, project-based program focused on building and managing cloud infrastructure using AWS services, implementing CI/CD pipelines, and practicing Infrastructure as Code (IaC) with Terraform and CloudFormation.
- Gained practical skills through real-world projects such as deploying websites on AWS, designing an automated deployment pipeline, and integrating monitoring tools for application health.
- Collaborated with mentors and followed Agile methodologies, enhancing technical expertise relevant to professional work environments.

Shatta fabrics & Curtains
Infrastructure System Engineer
March 2019 - February 2020 (1 year)
Cairo Governorate, Egypt

Job Responsibilities

Network and infrastructure management:

Maintain and monitor network systems, data centers, and virtualized environments

Administer network equipment, firewalls, and VPN servers

Manage infrastructure services (DNS, DHCP, Active Directory, etc.)

System administration and security:

Handle Unix and Windows servers in both cloud and local environments

Manage user accounts, emails, and antivirus systems

Perform vulnerability assessments and implement security measures

Maintain 99.9% uptime through proactive monitoring and management

Technical support and documentation:

Provide on-site and remote technical support

Offer expert advice on system-related issues

Maintain project plans and system documentation

Coordinate with vendors and consultants

Education

Information Technology Institute (ITI)

Diploma , Network and System Administration · (October 2018 - January 2019)

Delta University for Science and Technology

Bachelor's degree, Management Information Systems · (2014 - 2018)
